SKILLS

Design Tools
- Figma
- Adobe XD
- Photoshop, Illustrator

UX & Product Design
- User Research
- Wireframing & Prototyping
- Interaction Design
- Design Systems (Components, Variants)
- Usability & Accessibility Basics
- Developer Handoff

Domain Experience
- ERP Systems
- Government & Public Sector Software
- HRM & Management Systems

EDUCATION

Bachelor in Computing (BCOMP)
UNIVERSITY OF GREENWICH, UK — 2021
- Upper Second Class (GPA 3.69)

LANGUAGES

- Bangla (Native)
- English (Professional)

CHINMOY KUMAR DAS

UI/UX DESIGNER | PRODUCT DESIGNER (WEB & MOBILE)

PROFILE

UI/UX Designer with 3+ years of experience designing large-scale web and mobile systems, including government ERP and public-service platforms. Practical experience working with business requirements and translating them into usable, scalable interfaces. Experienced in end-to-end design — research, wireframing, prototyping, design systems, and developer handoff — for products used by thousands of users across Bangladesh.

WORK EXPERIENCE

IBCS-PRIMAX Software (Bangladesh) Ltd.   MARCH 2023 – PRESENT
UI/UX Designer
- Designed web and mobile interfaces for 5+ government systems, including BOF, BCIC, WASA, CTM, and NGPIMS.
- Created end-to-end UX flows, wireframes, and high-fidelity prototypes using Figma for ERP and management platforms.
- Designed and maintained design systems (components, variants, grids) to ensure UI consistency across multiple products.
- Collaborated with developers, product managers, and government stakeholders, reducing requirement misunderstandings and rework.
- Improved form usability and data entry efficiency for complex government workflows by simplifying layouts and validation logic.

Subra Systems Ltd.   September 2022 – February 2023
UI/UX Designer & Business Analyst
- Acted as a bridge between business requirements and user-centered design for enterprise software projects.
- Conducted requirements gathering, stakeholder interviews, and process analysis before translating needs into UI flows.
- Designed dashboards, forms, and workflows that aligned business rules with usability best practices.
- Worked closely with developers to ensure accurate UI implementation and smooth handoff.

Softavion Ltd.   March 2021 – August 2022
Business Analyst
- Gathered and analyzed client and stakeholder requirements for enterprise and internal systems.
- Documented workflows, pain points, and functional requirements to support development and UX teams.
- Contributed to process optimization by identifying gaps in existing systems and proposing improvements.
- This role built the foundation for transitioning into product and UX design.

KEY PROJECTS

Cash Transfer Modernization (CTM)

Client: Government of Bangladesh

Problem

The government needed a modern system to manage 1 Lac +User cash assistance programs with high accuracy, auditability, and ease of use for operators.

My Role

UI/UX Designer responsible for workflow design, data-entry screens, and admin dashboards.

- Beneficiary registration & verification flows
- Payment processing screens
- Error handling and validation UX
- Admin dashboards for monitoring transactions

Link: dss.bhata.gov.bd

Bangladesh Ordnance Factories (BOF)

Client: Ministry of Defence

Problem

BOF required a secure and efficient system to manage internal operations and reporting.

My Role

UI/UX Designer for enterprise internal tools.

- Data management screens
- Internal dashboards
- Structured workflows for operational teams

Link: Ongoing

WePeople – Advanced HRM System

Client: Off-the-shelf Product

Problem

HR teams struggled with inefficient employee, attendance, and payroll management through outdated or fragmented systems.

My Role

UI/UX Designer responsible for product usability and interface structure.

- Employee profiles & management screens
- Attendance and leave management flows
- HR dashboards and reports

NGPIMS

Client: Bangladesh Police

Problem

Bangladesh Police teams needed a centralized platform to manage All Information, personnel, and operational data, replacing fragmented manual processes..

My Role

End-to-end UI/UX Designer working with business analysts and developers.

- Role-based dashboards
- Data tables, filters, and reports
- Multi-step forms for government workflows
- Design system for consistency across modules

Link: ngpims.police.gov.bd

Meter Management System (WASA)

Client: Dhaka WASA

Problem

WASA needed a system to manage thousands of water meters, readings, and customer data without manual paperwork.

My Role

UI/UX Designer working on data-heavy operational screens.

- Meter listing and tracking UI
- Reading input & validation screens
- Customer and billing-related interfaces

Link: Ongoing
